

***You Decide - THIS***

*“Operators of pits and quarries remove virtually all vegetation, topsoil and subsoil to access the resource. In so doing, they remove any natural habitat that may have been on site, and disrupt pre-existing stream flows . . . Once the aggregate is extracted . . . water storage capacity is lost. Aggregate operations . . . are characterized by the release of significant amounts of particular matter (i.e. dust) and noise pollution from extraction and processing activities as well as smog precursors and greenhouse gases from the operation of heavy equipment and machinery.” (<http://crushthequarry.org>)*

***or - THIS***

*“Having a quarry near your town adds jobs and tax dollars, and gives the local economy a boost. A close relationship between quarries and your community is essential”.*
